Price: USD 5.00 docs.google.com Overview This worksheet tries to catalog all global customizations in Borderlands 3, ie: the ones that you unlock once and then have in your profile forever. It keeps track of character heads/skins/emotes, weapon skins, weapon syncettes, ... Beastmaster (Fl4k) heads: Beastmaster (Fl4k) skins: Gunner (Moze) heads: Gunner (Moze) skins: Operative (Zane) heads: Of operative (Zane) skins: Siren (Amara) heads: Siren (Amara) skins: 14 Likes propelerhead: which are only available to members of the Gearbox Programming Power Team (yet?). You can check the check out here: Here's the better photo. Propelerhead: Psyren irc this head (all VH) is a reward from story missions after beating Troy, 2 Like Thanks I edit the list. Does anyone know if the new heads posted above are obtainable in Maliwan Takedown? I finished it yesterday and just get the skin. Are the heads the rare drop from the boss or something? 1 As I saw one of the guys from the BL stream team on Twitch a few days ago, he said the skins were in the game before Maliwan Takedown and it may drop, but the heads aren't. He didn't say anything else, whether Gearbox will add it, or not. 1 Like That's weird. I know they were added somewhere around October 24 cause the total list changed from 26 to 28. One of it was Bloody Harvest's head, so the other should be this. (this post will be almost identical to the one I just left on your second customization-list thread, btw.) Hi, and thanks for posting this list! It was pretty helpful. I had put my own spreadsheet version of this together, with an eye toward possible modding (so it contains the actual in-game object balance references, etc), which I've now got online here: -- your data was quite useful for filling in some gaps. One thing I wanted to mention in here is that like the second customization list you had, the world drops don't actually have an increased chance of dropping from any of the named enemies (Tyreen, Traut, Graveward) Anyway, thanks again for the list! 2 Like all story mission rewards skins are tapped too like NOG Head. Atlas Classic - Mission Reward: Atlas, Finally Gilded Rage - Mission Reward: Cold as the Grave Signature Style - Mission Reward: The Great Vault Ah, thank you, good to know, I'll update it! Edit: You all said but then only listed three – I guess you meant that literally all the skin mission rewards characters are tapped, and not just these three? Unfortunately, only three listed above. Caustic Bloom is from story mission, but it works fine. I missed it in the list that's why I said all Aha, good deal! Glad I edited conservatively, then. 1 As I found your thread while looking for the last Zane head I'm missing and noticed how you said enough the mask is either glitched or non-existent. I swore I had this and Had to check. When I check my Moze, I got it for her. Looking back im not sure where or when exactly I acquired it this can be huge, do you have a physical copy? And if so, for what platform? On the PS4 at least I've been told that it is normally rewarded as of version 1.0,and the very next update for some reason removed it from existence. Gearbox has been fully aware of this since October and has chosen to make ... Nothing. Sadly I don't have a physical copy. I'm a collector of everything in the game. But it must have been before I started duplicate sheads and skins that I receive. Because the space was very limited early. I started using a second second to keep everything not long after release. And I'm on PS4 Actually, for some of the missions you're going to get skins or heads as a reward, you get a gun or a grenade mod instead. Which is really annoying... I still find his ahead of crap that the so-called current team heads are still not available for every1 yet even doh gearbox said it would be. I've had the patience with the fact that they were originally advertised before the Halloween event, lets believe we'd get them from it. But then give us the stupid Halloween head and to come out with this stream team BS. Now after 3 major updates/DLC's heck, takedown and handsome jackpot. Still no fucking anubis head, so what in the underworld is the deal gearbox And all it does now is discourage me from watching YouTube vids every time I see a streamer using it as click bait They are in Maliwan theme, so probably should be rewarded in takedown with skins, but are bugged. 1 That should be the keywords A lot of customization items are tapped, unfortunately like a lot of things throughout the game. Went through your list, and I can confirm that Jack Plaque is dropped by Gorgeous Armada next page
